Better Value at Wight's

Although Wight Nurseries continue to grow a full line of general nursery stock, we are offering in this listing only those items that we believe will be especially attractive to you because of better values through quantity production and the best cultural practices.

We are especially proud of our Pecan and fruit trees. This is our 64th year of Pecan production. These many years of growing Pecan trees make us able to give you the very highest quality nursery stock at most reasonable prices.

Camellias and Azaleas are another one of our specialties. Grown practically in full sun, under the most up-to-date irrigation system, they are heavy, well-branched plants, not to be compared with those grown in slat houses or in heavy shade.

We believe this season offers one of the finest lots of nursery stock we have ever grown. You will be especially well pleased with any stock you get from Wight this year.

POSTPAID

(Minimum order \$3.00)

Kaiserin Auguste Viktoria. H.T. White. One of the best.

Poinsettia. H.T. Long, pointed, scarlet buds.

Talisman. H.T. Red and gold buds, opening orange-yellow, pink-
tinged.

White American Beauty (Frau Karl Druschki). H.T. An old
one, but still one of the best.

Paul's Scarlet Climber. Large clusters of semi-double, scarlet
flowers in early spring.

For the Home Fruit Garden

PEARS

A most satisfactory fruit for the home garden.
Requires no spraying and makes a beautiful spring-
flowering tree.

Baldwin. One of the newer blight-resistant Pears,
which is being well received wherever planted.
Vigorous tree producing medium-size, juicy, fine-
grained Pears of wonderful flavor. Blooms about
a week later than Pineapple.

Harper. A new variety producing russet fruit, very
juicy, slightly acid and of high quality. Medium
grower.

Kieffer. A large Pear with yellow, juicy fruit. Does
best in the upper South.

Pineapple. A blight-resistant Pear especially
recommended for cooking and preserving.

FRUITS and SHRUBS for Your Own Home Garden

CAMELLIA SASANQUA

Excellent throughout the whole Camellia territory, but especially good in the northern edge of the Camellia belt, where flowers come in early fall before frost can hurt the blooms. Fast growing.

APPLE BLOSSOM. Medium size, shell-pink. September. 8 to 24 in.

DAWN. Large, semi-double, light pink, with deeper pink margin, appearing from September to November. 8 to 18 in.

SETSUGEKKA. Large, semi-double flowers of pure white, with a touch of pink at the end of the slightly ruffled petals. 8 to 24 in.

SNOW-ON-THE-MOUNTAIN (Mine-No-Yuki). Probably the best of the white Sasanquas. Vigorous, loose open grower. 8 to 24 in.

HUNT GRAPES

HOLLY (Ilex)

The following Hollies are characterized by slow, compact growth and are especially adapted to the modern bungalow or ranch-type house.

CORNUTA (Chinese Holly). Dark green leaves, usually five-spined, with large red berries.

CORNUTA BURFORDI. A form of the above, with rounded leaves usually with a single spine.

CRENATA BULLATA. A much-branched shrub with small, dark green, oval leaves. Attractive berries.

CRENATA ROTUNDIFOLIA. Similar in habit to Bullata, but with a little larger leaf. Excellent compact grower.

MUSCADINE GRAPES

Commercial plantings of Muscadines on a two-wire trellis are proving quite profitable in the lower South. The following varieties are the best for commercial growing and for home fruit planting.

Brownie. Excellent small fruit with high sugar content. Late September.

Creek. Large clusters of reddish purple fruit. Early October.

Hunt. Very prolific producer of large black Grapes. Middle September.

Scuppernong. An old favorite in the South.

Male Scuppernong. Plant one to each ten female vines as a pollinizer.

Yuga. Light bronze fruit ripening in late September.

Postpaid	Each	10	100

ILEX CORNUTA BURFORDI

JARVIS RED

FOR PROFIT AND PLEASURE

PECANS

IDEAL FOR SHADE

Pecans make ideal shade for your new home. Used to frame the house, they will provide shade in summer and let the sunshine in during the winter. A few trees planted around the home, even on a small city lot, will provide both beauty and a good supply of Pecans for eating.

Brooks. Promising new variety with excellent cracking qualities. Although small, it is a heavy producer, resistant to disease. Supply of trees limited.

Curtis. A very thin-shelled nut with sweet meat of excellent flavor. An old variety which has quite recently come back into favor. Supply of trees limited.

Desirable. Large nuts of delicious flavor. Originated 1915-20 in Mississippi, but lost until discovered some years later by U. S. Department of Agriculture. Excellent cracking and separating quality. Early and prolific bearer.

Farley. A new variety highly recommended by Georgia Coastal Plains Experiment Station. Vigorous and prolific. Early bearer; disease-resistant. Nut medium sized, round, well filled. A plump kernel, high in oil content, makes it a good cracker.

Moneymaker. An early and prolific bearer and a healthy, vigorous grower. It is proving a very profitable commercial variety.

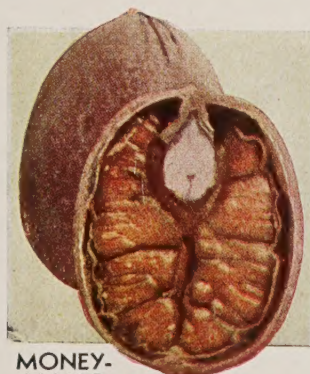

Schley. This variety is placed by some at the head of the list. It is a large, thin-shelled nut of fine flavor and is well filled with meat. Liable to scab. In quality of meat and thinness of shell it is surpassed by no other variety.

Stuart. An old favorite that has been widely tested. This is a variety that can be planted with safety and succeeds over a wider territory than probably any other kind.

— AZALEAS —

A RIOT OF COLOR FROM FEBRUARY TO MAY

Some of the most spectacular gardens in the South are planted largely with Azaleas, for these magnificent plants are more colorful than any other flowering shrub. They have so many good points that every Southern home owner should take full advantage of them and make his own grounds a counterpart of the large estates where Azaleas are planted so freely. Even a few plants in the proper setting can lift a planting above the ordinary and bring pleasure to everyone who sees them.

- 3. WHITE
- 5. PINK
- 2. LAVENDER
- 4. SCARLET

- 7. ROSE-RED
- 6. VARIEGATED
- 1. SALMON

Wight's Azaleas are grown practically in full sun, with plenty of space, so that they are heavy and well branched, and not to be compared with slathouse-grown plants grown close together. It takes sunshine and spacing to make a compact Azalea. Ours get plenty of both.

In transplanting, care must be used that Azaleas are set no deeper than they stood in the nursery. They are surface feeders, and if planted too deep, will surely die. Plant in a good, loose garden soil to which liberal quantities of either woods earth or

peat moss have been added. Do not cultivate around Azaleas. Mulch with pine straw or similar material.

Azaleas will do well in partial shade, but they make the nicest plants in full sun, provided they get plenty of water. They require much more water in full sun than in partial shade. Do not forget this.

Meet the few requirements of Azaleas, and they will give you a riot of color and years of satisfaction. For the best, plant Wight-grown Azaleas

WIGHT NURSERIES — CAIRO, GEORGIA

AZALEA, CORAL BELLS

AZALEAS

GROUP II

Medium growers, generally more compact than Group I, and therefore showier when in bloom.

DIXIE. Salmon-red. Strong grower. Midseason. 6 to 18 in.

FIELDER'S WHITE. The best white Indica Azalea. Midseason. 6 to 18 in.

GEORGE FRANC. See illustration. Early. One of the best. 6 to 18 in.

GEORGE LINDLEY TABOR. An excellent variegated Azalea, much in demand. 6 to 18 in.

LAWSAL. Lovely salmon. Tops in this color. Late. 6 to 18 in.

MACRANTHA. See illustration. Pink flowers in June; compact, bushy. Very late. 6 to 15 in. only

PRIDE OF MOBILE. See illustration. One of the Azaleas most in demand. Hardy, vigorous, mid-season. 6 to 15 in.

AZALEA, GEORGE FRANC

AZALEA, PRIDE OF MOBILE

Wight's Azaleas are strong, vigorous plants ready to go in their permanent location in your garden. Properly planted, they will grow off well and give you a wealth of bloom right from the start. They are not to be confused with liners, which should not be planted in their permanent location for two years.

CITRUS FRUITS

Recommended for the seaboard of South Carolina and Georgia, for the lower 75 miles of the states of Georgia, Alabama, Mississippi, Louisiana, and for the Texas gulf coast.

An important requirement of all citrus is that it be planted no deeper than it stood in the nursery.

OWARI SATSUMA ORANGE

See illustration. Ripens October and November.

One-yr., bare root, postpaid \$1.49 each; \$12.45 for 10.

Two-yr., bare root, postpaid \$1.98 each; \$17.45 for 10.

Ask for prices in 100 lots for commercial planting.

DUNCAN GRAPEFRUIT

Hardest of the Grapefruit. Fruit large, juicy. Ripens October and November.

Heavy budded trees, \$2.49 each, postpaid.

OWARI SATSUMA
ORANGES

KUMQUATS

KUMQUAT

See illustration. Excellent for desserts, jellies, jams, preserves and marmalades. Hardy, heavy bearers.

MEIWA. Fruit large, round.

NAGAMI. Fruit oblong.

1-yr. buds, \$1.79 each, postpaid

MEYER LEMON

Hardest of the Lemons, but more tender than other citrus fruits listed.

1-yr. buds, \$2.49 each, postpaid
